## **TTA Associate Membership**

Founded in 1905, TTA is the oldest and largest telecommunications association in the Lone Star State. Our member companies serve over half of the land mass of Texas, serving over 3.5 million customers and over 2,000 anchor institutions. Over 40 ILECs make up the primary membership of the association, and associate memberships are available for other industry companies to participate in the association.

Your TTA associate membership entitles you to access members-only information about regulatory and political issues affecting the rural telecommunications industry in Texas. It will also allow your company to be listed in our membership directory, where ILEC leaders go to look for vendors who are members of the Association. Your company logo will be shown on the [tta.org](http://tta.org) homepage and other pages on our websites, showing your support for Texas rural telecommunications providers.

TTA associate members get priority in registering for and sponsoring TTA events across the state and enjoy member-only pricing for TTA events and meetings. These include:

- **TTA Spring Training - May 12-14, 2025**

TTA member company personnel in finance, customer service, marketing, and technical skills will gather in Austin, Texas, for continuing education training and industry updates. Sponsorship opportunities are available to associate members.

## **TTA TXConnect Membership Summit - August 3-7, 2025**

Held in Austin at the Omni Barton Creek Resort, over 200 telecom leaders will meet to discuss our industry, participate in panel discussions with telecom leaders, enjoy golf and other recreational opportunities, and celebrate the Texas rural telecommunications industry at our annual awards banquet. Associate members can purchase discounted trade show space to meet with industry leaders in our vendor showcase area and sponsor the various conference activities.

Associate members have the opportunity to provide speakers and content for TTA meetings, as well as have input on TTA membership initiatives and industry updates. Advertisement opportunities at our events and in our publications are also available.

TTA is a member-driven organization, and we strive to provide all of our members the resources and opportunities they need to better serve a connected rural Texas.
